## GREAT SALT LAKE AND PROMONTORY OIL AND ASPHALT CO., INC.

HE property of this company , presents by far the most promising prospects for oil and asphalt yet discovered in this state. Development work to prove this has been unnecessary. The proof appears in abundance right on the sur-

OUR PROPERTY.

The company has already acquired, by location and otherwise, over 1,500 acres of oil lands carefully selected. covering ground within about 200 feet of the wonderful oil and asphalt springs which were recently exposed by the recession of the waters of the Great Salt Lake, These springs or seepages are located about six miles west of the Promontory Mountains and on the North shore of the Great Salt Lake.

VALUE OF PRODUCT.

Analysis of the crude material by a

Mr. W. B. Wilson, secretary. These, with the following gentlemen, comprise the board of directors: T. E. Black, Dr. J. S. Gordon, Jesse J. Driver and G. L. Diffenbaugh.

All the officers are men of high standing in the community, and the affairs of the company will be conducted along the most economical lines possible condistent with successful business management.

OUR PLAN.

In order to purchase a standard rig with which to develop the property, the company has placed a small ment of stock available to investors at 10 cents per share the stock being nonassessable is a feature to be deeply

To offset the possibility of assessments, one half of the entire capital stock has been placed in the treasury of the company.

OUR STOCK AS AN INVESTMENT.

The Great Sait Lake & Promontory Oil and Asphalt company in presenting its stock to the public as an invest-ment, believes that the wonderful surnumber of noted chemists give the ment, believes that the wonderful sur-same general results, showing high face indications fully warrant the ex-

Apparatus for Forcing Steam Below the Surface, Which Liquifies the Asphaltum and Causes it to Rise To the Surface, Where It Is Barrelled.

values in oil, asphaltum and other commercial products.

TRANSPORTATION. The Southern Pacific railroad is within eight miles to the north and

can be reached with very easy grade transportation reasonable Further, the property of the company being situated on and near the north transportation, by navigable waters, to a station on the Southern Pacific's Ogden Lucin cut-off, a distance of about 15 miles.

INCORPORATION.

The company is incorporated under the laws of South Dakota. Capitaliza-tion, \$1,000,000; Divided into 1,000,000 shares; par value \$1 each; non assestreasury reserve, 500,000 shares; no preferred stock.

OFFICERS AND MANAGEMENT. The company is officered by strong,

business management Mr. J. H. Spargo, president, is one of the most successful and conservative business men in the State of Utah. D. Pyper, vice president, is

known business man of Ogden, and a director of the Boyle Furniture Mr. A. D. Chambers, treasurer, is

now serving his fourth term as the treasurer of Weber county.

pense of development work anticipated, From similar surface indications the great Coalinga and Los Angeles oil fields of California were developed.

WHEN TO BUY STOCK.

Buy stock now if you desire the best result from your investment. You may purchase stock in a producing com-pany if you are satisfied with very small margins. You can buy gold dollars for 100 cents each, but there is

no profit in the investment.

The people who make the big money are those who come in at the beginning. Ten cents will buy a share of stock today, but in a few months it may be worth many times that amount.

WHAT WE HAVE. No salaried officers.

500,000 shares treasury stock. Some of the first oil lands located in Conservative and responsible man-

Capital stock fully paid up and non- | to come from the north shore of the

a mining engineer of high reputation and a recognized expert. His statements are entirely disinterested: The year 1903 witnessed the greatest

discovery ever made in Utah. This is nothing less than the certainty that both oil and asphaltum underlie the great basin of Salt Lake in quantities commensurate with the magnitude of the vast area covered by the former bed of old Lake Bonneville.

For several months past I have made this subject a study. During the month of June. 1903, I took up this question, at many points between Salt Lake and igden, and also as far north as Brigham City, in Boxelder county, gave reason for belief in the existence of oil and asphaltum throughout the region mentioned; but direct evidence of the

my knowledge. In the autumn of 1903 I saw an exhibit of asphaltum at the National Ir- | rise out of the lake, and each of these rigation congress in Ogden, purporting are like cones resembling ant hills.

A limited amount of treasury stock lake. Upon examination I found it of high purity, and much resembled Trinifor sale for development purposes at did or California asphaltum. Very lit-10 cents per share. did or California asphaltum. Very lit-tle attention was given the exhibit. The following extracts are taken from a report written for the Salt Lake Mining Review by Don Maguire. Sonally I gave but little attention to it. sonally I gave but little attention to it. However, to settle in my mind the truth or falsity of statements made, I planned an expedition to the reputed place of discovery, which lies at a point 15 miles southwest of Promontory station on the Southern Pacific railroad. The stretch of country that one has to travel over between the lake shore and this station is level, but of a desert nature. Grease wood and sage brush cover most of the country. The day of our journey to the spot was cold and bleak, and as we neared it I saw that the shore line had changed, confronted by hard problems, the solution of which was difficult, inasmuch as there was hardly a thread to lead me into the field of true discovery. I admit that the presence of natural gas the waves in the old days, I found constitution of the solution ditions existing that upset my former opinion, based on conditions as they appeared 22 years ago. A short distance from the base of the igneous measure there shows the outcrops of the green sandstone, and farther out, where the thin sheet of salt water touches the sandy shore, scores of small islands; I might say hundreds,

asphaltum, similar to what I had seen at the Irrigation congress in Ogden. Wading, with my assistants, for some hundreds of yards into the lake, I carefully examined a number of these small islets, none of which are wider than 100 feet in diameter, and neither is there one of them that is more than two and a half feet above the water.

These islets are wholly formed of the outflows of asphaltum, and they rise as vents from the lake bottom. The weather, at the time of our visit, was cold, and yet there was a great outflow from each of these cones in the islands. Around each small cone there lies a circular, solidified sheet of still but half-dried asphaltum, resembling a huge pancake. And these issues, for generations, have been washed out to eep water by the strong waves, and lie in undetermined quantities as huge boles of sand-mixed asphaltum at the

lake bottom. The rock formation that reaches up of the base of these small islands, is to the base of these small and, treated for the asphaltum contained therein, would return a distillation of about 40 per cent asphaltum. Upon carefully examining the little summit of each cone,

issuing oil with the flow of asphaltum. This is soon wasted away by the waves and at many points along the southeast shore we find traces of where this black

plack coating on the rocks.

oil, carried by the waves, has left a exist below the lake-bed area, has formed small vento and fissures, giving

oil, carried by the waves, has left a black coating on the rocks.

I found that some five or six years ago a Frenchman, associated with Mr. Truman Schenek, of Salt Lake City, located interests at this point, and to develop the property they purchased a section from a steam boiler which they saik into the sand and mud until it reached the impervious clay, then, pumping out the water, they drove down a two-fach pine to a depth of about 40 feet. Through this pine a considerable quantity of asphaltum issued forth for a time, flowing over its rim. It would seem, however, that it was but a short time before the flow was checked. And, strange to relate, Mr. Schenck and his associates were unable to draw the attention of capital to the spot, for it seemed that they soon after abandoned the enterprise.

Others took it up, but the story of asphaltum existing there was not generally credited. The wild, avoid certainly be an ideal region in which to announce a fake discovery of any kind by a crafty fakir. The year 1903, however, verified the existence of this most promising field. Late in the fall of this year a party of capitalists.

Standard Oil Rig Which is Sinking on Land Adjoining That Owned By This Company. As Soon As It Strikes Oil, Stock of This Company Will Advance Enormously.

visited this locality; but, owing to in-clement weather and the lack of a pro-per guide, they did not reach the ground that would have disclosed to them the importance of this discovery, and they went away in almost total ignorance of its value. At the time of my visit, however, I examined a number of the largest of the islands and

asphaltum rock. The present owners of this property, known as the "Seepage," have organ ized a company, and shortly after my visit began to sink an oblong, vertical shaft, which was carried down to a depth of about 30 feet, and timbered. When the warm weather of summe

secured about 400 pounds of asphaltum

comes the now sluggish asphaltum will fill this shaft, but far more vigorous work than this must be done to de-velop this splendid showing on the The area in which this asphaltum and oil exists is found here to be about 10 miles in length and from three to commercial scale, dividends on the four miles into the lake. It is wholly stock will certainly be large. on the west side of the great promon-tory, and it is but little wonder that it has been so long unknown to the peop vents of Utah. Upon leaving the spot I felt that this was one of the greatest discoveries ever made within the confines of the great basin. Here, where the

In process of refining the asphalt yields a heavy percentage of lubricating oil of the finest quality, worth from \$8 to \$10 per barrel of 50 gallons.

All that is required to enable this company to put asphalt and oil on the market and begin the payment of dividends, is a small amount of surface development work and a plant that will cost no more than a few thousand dollars, with which to refine the asphalt, separate the oil, etc. Under present conditions and on a small scale the excavation and reduction of the raw ma-terials can be made profitable with only the crudest tools and apparatus, thus showing that the wealth producing substances are there and easily aocessible.

As soon as operations are begun on a

Unquestionably now is the time to buy stock. The company has a great amount of proof, in the way of scientific reports, chemical analyses, etc., confirming all that is here said, and the secretary will be pleased to communicate the fullest information.

Address W. B. Wilson, secretary, Courthouse, Ogden, Utah.

#### C. A. SMURTHWAITE PRODUCE COMPANY.

EW names of business men in the intermountain region are better known than is that of Charley Smurthwaite of Ogden. About 17 years ago he first engaged in the produce business at Ogden, and has continued in it ever since. For many years he has been known as one of the shrewdest and most enterprising grain dealers in all the mountain states, and he has probably bought and shipped out of Utah more wheat and other grain than any other one man that ever engaged in the business. The tonnage for 1904

alone amounts to 26,000 tons. the buying, selling and shipping of wheat has been one of his specialties, it has not, by any means, engrossed his energies. He has given a great deal of attention to the handling of field seeds. In this particular line he has been remarkably successful, and has built up a reputation that might be called inter-national. lisplays of seeds at great fairs and exhas secured highest awards as follows:

Tennessee Centennial, 1898. Trans-Mississippi, 1899. Paris, (France), 1900.

After having, by his business pluck, energy and ability, built up a valuable business, he decided to incorporate it, which he did in the year 1893, under the A. Smurthwaite Produce The corporation has an authorfred capital of \$25,000, divided into 250 shares of the par value of \$100 each. The business of the corporation is under the direct personal supervision of Mr. C. A. Smurthwalte, as general manager and he devotes to itorough training and unusual qualifiwhich nature, combined with ong experience, has endowed him with buying, selling and shipping of wheat, oats, barley and seeds, particu lucern seed, are the principal specialties of this company.

It has active and intelligent agents principal grain and lucern districts of Utah and adjoining states, in the fall of the year, and they buy or contract for the grain and lucern seed which the farmers produce. These products are shipped wherever they may be in demand, and the volume of asiness done by this house is very arge, aggregating for this year nearly

The corporation partakes largely of the personality of its founder, who, for many years, has been a prominent influential character in the mercial life of Ogden. Pleasant and genial in manner, always up to the minute on market values. Keen and shrewd in business, fair and honorable in all his dealings. Charley Smurth-waite has a host of friends scattered all over the intermountain states.

The C. A. Smurthwaite Produce company is always ready to fill orders from points, east, west, north or south, throughout the vast area of which Ogden is a shipping and commercial It is also ready at all times to pay the highest prices for grain and lucern seed. Buyers and sellers of grain and seeds would do well to get wotations from this house before deal-

## SIMMONS HARDWARE CO.

This famous St. Louis house, the largest hardware concern in the world. displayed the business enterprise and judgment which have secured this distinction, when it decided to locate a branch house in Ogden. This move was made about two years ago, and Mr. Edward E. Stewart was placed in charge. A location at 2,140 Wall avenue was selected, and a large warehouse was erected, with trackage fu-

cilities. Here is carried an enormous stock of the goods dealt in by this house, the design being to have here a depot from which the hardware trade of the entire Intermountain region could be supplied and without awaiting shipments from the east.

hardware trader of the inter mountain states is too familiar with itnes carried by the Simmons Hardware Co. to render necessary a description of them here. Suffice it to say that they embrace all descriptions of shelf, heavy and builders' hardware, mechanics' tools, and implements, conractors' supplies, table and pocket cuttlery, kitchen utensils, wooden ware, stamped ware, tin ware, etc., etc. During Mr. Stewart's administration

as manager of the Ogden branch of this mammoth concern, he has steadily reased its trade and has made himself very popular among its patrons. He has built up for himself an enviable reputation for fair and honorable deal-ing, and in point of business energy, activity and good judgment, has shown himself worthy of and well qualified for the important trust reposed in him. Retail dealers who handle hardware would do well to get quotations from the Simmons Hardware Co., branch, before placing their orders.

## A COLLECTION AGENCY.

The system of giving credit to those who have no money and desire to purchase goods, has made it possible for another business to grow and flourish another business to grow and flourish He has branches at Collinston, Cache water, put a plate ov. In all the larger cities and towns of this Junction, Logan, West Portage and simmer for six hours.

the several railreads that run out of | western country. The business referred to is that of making collections from those who have received credit and for some reason have not paid for the goods bought. It would seem that a col-lection office should not be a necessity in any community, but it certainly is and were it not for collections being made by this method many thousands of dollars entrusted to the people would never find their way to the business

house that had extended the credit. Wearying of waiting for pay day to arrive the merchant decides to place his account with an attorney or a collection agent with instructions to force collection of the account and if impossible to collect it by any other method.

of collection offices and agents who conduct this sort of a business, when they for such an institution to thrive. merchant who does a credit business has hundreds and often thousands of dollars on his books that he is doubtful whether he will ever be able to collect This is the class of accounts the collector is particularly interested

There is an office in Ogden where this class of accounts is handled. It is at room 44 First National Bank building. go to a collector, know who operates it Merchants who want to realize something from their hard and dilatory debtors would do well to consult E. A. Stratford. He gets the money when others fail. Try him. "He is liked by everybody."

#### W. O. KAY, PRODUCE DEALER

Mr. Will O. Kay may be said to be an excellent type of the bright, plucky and successful young business men for whom the city of Ogden is noted. He comes of an old Utah family, and is the son of David Kay, who, twenty years ago, was a leading business man of Ogden, and one of the heaviest produce dealers in the intermountain

country Young Mr. Kay acquired a thorough knowledge of and experience in the produce business while in the employ of a leading house in that line, and about three years ago he set up in business on his own account. He owns the premises which he occupies at No. 2484 Washington avenue

He does a heavy business in buying and shipping wheat, oats and barley and his trade is rapidly increasing. He makes a specialty of buying and shipping hogs, wheat, oats, alfalfa seed and grain bags in car lots. He has business connections on the coast that are of great advantage to him, and they enable him to find a

ready market at the best prices for the lines he handles. Mr. Kay has already made for himself an enviable reputation for enter-prise, business ability and fair and honorable dealing. His commercial credit is excellent, and he is rapidly coming to the front as a prominent and successful business man.

He is prepared to fill orders in his is tributary to Ogden as a shipping or wheat, oats, barley and hogs.

Smithfield, Utah; also at Weston, Downey, Preston, Elva and Rexburg, Idaho, each branch being managed by a capable agent.

#### OGDEN CANNING FACTORIES.

All the canning factories in Ogden City, Weber, Davis and Boxelder countles excepting the Utah Canning com. pany of Ogden combined this year into one large corporation, known as The Utah Selling & Storage company. All the products of these 15 factories are placed under the control of the new corporation, who negotiate for the sale of the same to the wholesalers and merchants. Through the combining of these factories under one selling management, the owners of the different factories all get the same price for their goods, and by having such a large quantity of manufactured goods they can get better shipping rates, ship in much larger quantities and thereby compete to better advantage with the eastern markets. Under the one management they can have their salesmen watching the markets, and when the prices are up they can sell their products, getting better prices. All of these advantages go to make the canning industry in these counties much more profitable. The office of the large corporation is in the Eccles building, Og-

During the year 1904, the various factories have manufactured 355.575 cases of various kinds of fruits and vegeta. bles, or 6,557,000 pounds, valued at over half million of dollars.

The Utah Seiling & Storage Co., con-sists of the following factories embraced in Weber, Davis and Boxelder counties as follows: Salt Lake Valley Canning Co., Five

Points. Wasatch Orchard company, Ogden. Banner Canning company, Oglen: Hooper Canning company, Hooper; Riverdale Canning company, Riverdale Willard Canning company, Willard; Canning company, North Ogden Canning company, North Ogden, Kaysville Canning company, Kaysville: Layton Canning company, Layton: Woods Cross Canning company, Woods Cross; Hardy company, Roy: Star Canning company, Roy: Syracuse Canning company, Syrause; Chief Canning company Plain

#### HOW TO MAKE A SAVORY FRENCH DISH.

Liver puddings well truffled and plentifully seasoned with garlt- to gether with the national "poulet," are seen on every Christmas table in France, accompanied, especially in the south, by the celebrated languedoe, stew, which is composed, according to M. Colombie, of the following materials: Beef, lean bacon, a clove, garlic, a small onion in which is inserted a clove, the third of a quart of wine, He is prepared to fill orders in his a small glass of cognac and some line from all points east, west, north or south, throughout the region which very small, and put the whole into a small earthen pot, the bottom of which is lined with thin slices of bacon. Charles B. Aycock, governor of North Carolina, illustrated a point he wished to make in a political speech by telling a story of a young man he knew whose father died, leaving considerable property. There were other sons and daughters of the man, and a contest over his estate

The dispute reached the courts and dragged along for several months. Finally a friend met the young man, and spoke about the suit and the consequent ill-

feeling.

"Yes." assented the youn man, "we certainly are having a heap of trouble over father's property. Brother John wants more than his share, sister Lucy hasn't spoken to me for a year; brother the property of the state o is threatenin, to do some shootin'.

I don't know where the thing will
Do you know sometimes I almost
the old man hadn't dled?"—Washington Times.

## CUT IT DOWN TO A STICK.

Congressman Stephenson told this one: Willie Stinson, while editor of a paper at Ashland. Wis., fell in love with the step-daughther of the publisher. The old man tried in valn to get rid of Stinson, and finally discharged him. Stinson went to Milwaukee and worked there for about three months. The young woman explained to all friends that the engagement was dissolved.

Finally Stinson went back to Ashland by a country road on horseback. He drove to the Congregational cutch with the pretty step-daughter of the publisher met him. She was surrounded by numerous girl friends Stinson had been recognized by several people as he rode to the church, and he was in a hurry to have the ceremony performed.

"Too you want the complete service?" Willie Stinson, while editor of a paper

the ceremony performed.
"To you want the complete service?"
Inquired the minister,
"'Cut it down to a stick,' repiled Stinson, in printers' English The preacher was amazed, but he understood and soon the knot was tied."—Washington
